

LIFETIME

OUTDOOR STORAGE

MODEL N° 6405

OWNER'S MANUAL

Keep this Identification Number in case you need contact our Customer Service Department.

IMPORTANT! PLEASE READ BEFORE BEGINNING ASSEMBLY

Dear Valued Customer,

We would like to congratulate you on your purchase of a Lifetime® Outdoor Storage Shed! We are confident that you have made the perfect choice and you will be very pleased with your new storage solution.

Lifetime® Outdoor Storage is part of the family of products created and manufactured by Lifetime® Products, Inc. Like all of our products, you can be assured that the quality of your Lifetime Outdoor Storage Shed is the best in the world! And, we back that quality up by offering the best warranty in the business – A 10-year warranty that fully covers the Shed!

All of our Sheds are built with the highest-quality steel and high-density polyethylene (HDPE) parts. The design and construction of our steel-reinforced double-Wall Panels is second to none. All of our exposed steel parts and gables are powder coated and we use high-density polyethylene plastic. What makes polyethylene so special? It has superior strength and durability, and, it won't crack or degrade outdoors.

So now that you know the quality you are getting in a Lifetime Outdoor Storage Shed, please take the time to **READ THIS INSTRUCTION MANUAL!**

We have taken great care in providing the best possible form of instructions to help you put your new Outdoor Storage Shed together. Before you get started, **PLEASE** read the following preparation tips to help you get started!

We can assure you, your construction experience will be a lot more enjoyable if you do!

PREPARATION TIPS:

- The first step is simple... **RELAX!** You have made a great purchase, but Rome was not built in a day. Plan to spend a good part of your weekend putting together your fine Outdoor Storage Shed. Our philosophy is, if it comes together quickly and easily, it surely will come apart quickly and easily! Your Lifetime® Outdoor Storage Shed will surely last a long, long time, if you are patient, and take all the time necessary to put it together as we have instructed.
- Grab a friend to join in on the fun! This is not a one-person endeavor. We have found that not only will things go smoother if you have two or more people participating in the construction of the Shed, but it will go quicker as well. So, the more the merrier!
- Make sure you have all the tools necessary for constructing your new Shed. There is a "Tools Required For This Assembly" list on page five of this Owner's Manual.
- The plastic pieces of your Shed may become damaged by over tightening the screws. To avoid this damage, we strongly recommend the use of a low-powered power screwdriver or a drill that has an adjustable clutch that is set on a low-torque setting. If neither is available, use a hand screwdriver. If a hand screwdriver is all you have, take several breaks... your wrist will need it!
- You will also need two small lockers (when it comes time to do the final).

IMPORTANT! PLEASE READ BEFORE BEGINNING ASSEMBLY

- Before beginning assembly, remove the Parts List from the center of this Owner's Manual and take an inventory of the parts included with your Outdoor Storage Shed. Also, read through the entire instruction manual. It's always a great practice to get a feel for the flow of the process and to familiarize yourself with the parts involved. But, try not to get ahead of yourself and start the process out of order.
- **FOLLOW THE INSTRUCTIONS IN ORDER!** Everything goes together in a certain order, and we have learned what that correct order should be. In our state-of-the-art research and testing facility, we have painstakingly created these instructions. The order of construction is there for a reason, and some parts simply will not fit if built out of order. Just follow along with the order in the instructions and everything will fit together and things will go very smoothly.
- **YOUR SHED MUST BE BUILT ON A LEVEL SURFACE!** If the spot you have chosen to place your wonderful new Outdoor Storage Shed is not level, the Shed will not assemble correctly! We recommend a concrete patio, a wood platform or creating a pad with pea gravel. Your Shed is meant to last a lifetime, so provide the proper foundation for it before you start to build.
- Before you build it, make sure you are allowed to build it! Consult all building codes, as well as city and county ordinances, to ensure that you do not require a building permit to construct your Outdoor Storage Shed. Proper building permit documentation may be required in your neighborhood, and it would be quite unfortunate to learn this after your Outdoor Storage Shed is already built!

Now that you're ready to begin the construction of your wonderful new Outdoor Storage Shed, step back, take a deep breath, get yourself a large cold beverage and enjoy yourself. We guarantee that after spending the right amount of time in building your Shed, you will be able to enjoy it for years to come.

Thanks for choosing Lifetime®, and have fun!

ABOUT LIFETIME PRODUCTS, INC.

Lifetime Products, Inc., has applied innovation and cutting-edge technology in plastics and metals to create a family of affordable lifestyle products that feature superior strength and durability. The world's leading manufacturer of folding tables and chairs, Lifetime was founded in 1995 as the maker of portable basketball systems that revolutionized the industry with patented technology. With diverse offerings such as outdoor storage sheds and steel utility trailers, Lifetime continues to develop innovative products that outfit the way you live.

Lifetime makes the things you need for the lifestyle you want. By innovating products in and around the home, Lifetime simplifies your everyday life and enables you to get the most out of your free time.

REGISTER YOUR LIFETIME PRODUCT TODAY!

There are benefits to registering your Lifetime product. After we have either tested registration later, it's fast and easy! Register with us at www.lifetime.com and enjoy these great benefits:

- Receive exclusive money-saving offers from BigLifetime.com, our online store, as well as NEW product notifications and special closed promotional
- In the unlikely event of a product recall or safety modification, we will notify you
- Registering your product guarantees you warranty service. If you do not register your product, your warranty rights will not be diminished. But you will need to provide a sales receipt to verify your product purchase date before warranty service will be provided.

LIFETIME'S PROMISE TO YOU:

Maintaining your privacy is our long-standing policy at Lifetime. And you can rest assured that Lifetime will not sell or provide your personal data to other third parties, or allow them to use your personal data for their own purposes.

We invite you to read our privacy policy at www.lifetime.com

SAFETY INSTRUCTIONS

FAILURE TO FOLLOW THESE WARNINGS MAY RESULT IN SERIOUS INJURY OR PROPERTY DAMAGE AND WILL VOID WARRANTY.

To ensure safety, do not attempt to assemble this product without following the instructions carefully. Check entire box and inside of packing material for parts and/or additional instruction material. Before beginning assembly, read the instructions and identify parts using the hardware identifier and parts list in this document. Proper and complete assembly, use and supervision are essential to reduce the risk of and extent of injury.

- Do not use or store hot objects such as grills, power tools, welding equipment, etc. near the product.
- If using a ladder during assembly, use extreme caution.
- Two capable adults are required for assembly. It is also recommended that a third adult function as an instruction reader.

Injury or illness may be caused by failure to follow all Assembly instructions. Use caution when using this product.

BEFORE BEGINNING ASSEMBLY

Keep the hardware bags and their contents separate. If any parts are missing, call our Customer Service Department.

Read the "Congratulations" letter on page 2-3. Identify and inventory all parts and hardware using the parts and hardware lists and identifiers in this document.

****Two adults required to complete assembly****

(+ one adult suggested as an instruction reader)

Only adults should set up the product. Do not allow children in the set-up area until assembly is complete.

ASSEMBLY GUIDES

Refer to the following areas throughout the instructions to assist in the assembly process:

This area is located at the top, left-hand corner of the page and indicates which tools and hardware are needed to complete the assembly steps on a page.

This area is located at the top, right-hand corner of the page and shows an image of the product with shaded parts indicating which section is being assembled.

This area is usually located in the bottom, left-hand corner of a step and indicates that special attention is needed to perform a particular part of a step.

These areas are usually located in the bottom, right-hand corner of a step and indicate that damage to the product or serious injury may occur if the caution or warning is not heeded.

Throughout the Parts & Hardware List, Part & Hardware Identifiers, and Instructions are three-letter IDs. These IDs are below the images of the parts and hardware to help you locate and identify the parts and hardware during assembly. These IDs are not necessarily on the parts themselves.

A02 (x10)
1/4" x 5/8" Pan-Head Screw

IMPORTANT NOTICES

Level Surface Notice:

Surface must be leveled before installation. We recommend building a level work space with a concrete or paver-style surface. If the surface is not properly leveled, the Outdoor Shed will not assemble correctly. Proper surface leveling will save you time in the long run, so please do not ignore this step.

Building Code Notice:

Consult all local building codes, as well as city and county ordinances, to ensure that the construction of the Outdoor Shed does not require a building permit. Proper building permit documentation may be required in your neighborhood, and it would be unfortunate to learn this after constructing the Shed.

Screwdriver Notice:

You may use a #2 Phillips head screwdriver bit and a power screwdriver or drill, instead of a hand automation. However, be aware that the plastic pieces of your Shed can be damaged by over tightening of screws. To avoid damage we strongly recommend the use of a low-powered power screwdriver or a drill that has an adjustable clutch that is set on a low torque setting. If neither is available, use a hand screwdriver. In any case use caution to avoid over tightening the screws.

Floor Puncture Notice:

Sharp objects may damage your floor. If resting sharp, heavy objects on your Shed floor, place a block of wood between the sharp object and floor.

CAUTION:

If more than six (6) inches of snow accumulate on the roof of the shed, carefully remove the snow to avoid possible roof collapse. While standing on the ground, remove the snow from the roof with a broom or snow shovel. Do not stand on the roof to remove snow.

STEP

1

SEC

11

SITE PREPARATION - CONCRETE PLATFORM PREPARATION

The actual dimensions of your shed (at its widest and longest points) are 8' x 10'. Ensure you select a site that will accommodate these measurements. The base of the shed is slightly smaller than this, so you will need to create a level surface that is at least 93 1/2" x 113 1/4". We recommend using a level cement or paver stone surface. This will provide the best long-term performance for your shed.

NOTE: Shed Extension Kits are available for this shed. Please consult your local retailer when planning the site for your shed. For more information on preparing your property:

NOTE: Surface must be leveled before installation. If the surface is not properly leveled, the Shedder Shed will not assemble or function correctly. Proper surface leveling will assist you later at the long end, as shown in step 12 on this page.

NOTE: Any platform or similar structure should be built above ground in order to assist with parking around the shed.

516

11

ALTERNATIVE SITE PREPARATION: OPTION 1 - WOOD PLATFORM ASSEMBLY

Ensure all lumber used is treated and approved for outdoor use. Build outside frame to 93 1/2" x 115 1/4" outside dimensions.

To ensure stands are in the correct location for seating, proceed to the next step, start measuring from the corner "D", and then measure from corner to corner.

Place the 2" x 4" x 88 L3" boards on the inside of the frame. Nail each board to place with the 10d nails.

TOOLS AND HARDWARE REQUIRED FOR THIS PAGE

48" x 80 1/2" x 3/4" Treated Plywood (x2)
(Not included)

22 1/4" x 80 1/2" x 3/4" Treated Plywood (x1)
(Not included)

1 1/2" x 1/8" Screws (x35)
(Not included)

SEC

1

SEC

1.3

ALTERNATIVE SITE PREPARATION: OPTION 1 – WOOD PLATFORM ASSEMBLY (CONT.)

Square up the frame by measuring from corner to corner. Measurement A should equal Measurement B.

Note: All frames must be built for safety and

SEC

1.4

Cut Plywood into sizes called for on previous page. Arrange the Plywood according to the diagram and nail into place with 8d x 1 1/2" nails. Place platform in the desired location. If platform does not rest level on the ground, build up low points with loose dirt until platform is stable. Drill three evenly spaced 1/2" drain holes in plywood between each 2' x 4' joist.

Front End

TOOLS AND HARDWARE REQUIRED FOR THIS PAGE

SEC 1

SEC

15

ALTERNATE SITE PREPARATION: OPTION 2 - FILLED WOOD FRAME ASSEMBLY

Cut outside frame in 8' x 10' outside dimensions. Lay boards flat so widest points face up. Ensure frame is level. Square up the frame by measuring from corner to corner. Measurement A should equal Measurement B. Nail on L-Bracket on each corner of the frame with 8d nails. Place platform in the desired location. If platform does not sit level on the ground, build up low points with loose dirt or "Fas" gravel until platform is stable.

NOTE: Alternative assembly placement over the surface described on Page 1.

Step 14 Number 14 is in red for Number 100.

SEC

16

Once all boards are level and do not wobble, back "Fas" gravel around the outside of the frame, and slope away from frame.

SEC

17

Fill in the inside of the frame with "Fas" gravel. Use a leveling board to scrape off extra fill material and to level the surface.

SEC

2

IF YOU PLAN ON ANCHORING YOUR SHED, CHECK WITH YOUR LOCAL HARDWARE STORE FOR SUITABLE HARDWARE.

SEC

2.6

ANCHORING THE SHED

If you plan on anchoring your shed, you can anchor it in your platform through the four indentations near the corners of the base. The anchoring hardware used depends on the platform. If you have a concrete platform, we recommend using four (4) 3/8" Anchor Bolts and four (4) 3/8" x 3" Flat Washers. If you have a wood framed platform, we recommend using four (4) 3/8" Lag Bolts and four (4) 3/8" x 1" Flat Washers. Do not exceed a 5/8" diameter for. Refer to your local hardware store for this hardware. Do not tighten anchoring hardware until instructed to do so at the end of these instructions.

Failure to anchor the shed may result in property damage under certain circumstances.

WALL PANEL INSTALLATION

Slide Corner Wall Panel (38) (2000). Fit tabs of Panel into the front, left corner of your Floor (sawtooth facing shed). Place a Wood Block (400) under the floor panel, directly under the first tab. Then pull down on the Corner Wall Panel until the tab snaps into place. Move the Wood Block under the next tab and repeat.

NOTE: Place the Wood Block (400) directly under the tabs as you insert them throughout the assembly. Keep tabs into place once set in place.

SEC

4.2

Snap two Wall Panels (400) and a Window Wall Panel (400) into place along the left side of the shed. The Window Wall Panel may be inserted in any side Wall Panel position. Ensure the tops of the Wall Panels are even and the holes align. Insert a 1/4" x 1/4" Post-Beam Corner (400) through the top hole of each set of Panels to fasten the Panels together as shown. You finish fastening the panels together towards the end of this section.

NOTE: A second person should assist you in the assembly of the Wall Panels for stable installation of the Series. All wall assembly for the Series.

WINDOW INSTALLATION

Remove the plastic protective film from both sides of the Window (A06) and slide the Window into the grooves along the sides of the casing in the Window Wall Panel (Fig. 1). Insert the 1/4" x 3/8" Pan-Head Screw (A02) into the hole at the bottom of the Window (Fig. 2) until flush. Attach a Window Latch (A05) above each corner of the Window as shown. When tightening the four 1/4" x 5/8" Pan-Head Screws (A04), ensure the Window Latches slide freely (Fig. 3). Do not over-tighten.

PERIMETER STRIP INSTALLATION

12.1

Using a level, position the Pegboard Strip (A9) in any desired location along a Wall Panel wall. Screw the Pegboard Strip to the Wall using two (2) 1 1/8" x 3/4" Phillips Pan-Head Screws (A10). See Note. Repeat the step for second Pegboard Strip.

Note: For Pegboard Strip to accurately identify into the studs, place the Strip anywhere on Wall to follow your power layout and mark a groove in the stud.

Note: Ensure the Pegboard Strip is level before securing it.

DOOR ALIGNMENT

In some cases, the shed doors may not completely line up at the tops (Fig. 1). When this happens, identify which side is higher and use a **Wood Shim (WD-6149)** to slightly raise the back corner of the high side until doors line up (Fig. 2). If doors need further adjustment, insert another shim under the front corner opposite of the first shim. If the doors still need further adjustment, stack additional shims (one at a time) alternating between the back and front shims. After doors are aligned, cut off any portion of wood shim that is still exposed. From inside the shed, drive a 1" nail through the floor into the shim to hold it in place. **Tighten all securing hardware now.**

CLEANING & CARE

Congratulations on your Lifetime® product purchase. By following the instructions below, your new Lifetime product should provide you with years of service and enjoyment.

Cleaning and Care

The polyethylene panels are stain- and solvent-resistant. Most stains can be removed, using a mild soap and a soft-bristled brush. Abrasive cleaning materials may scratch the plastic and are not recommended. Repair scratches or rust spots on the metal by sanding the affected area lightly, using a rust preventative spray primer, and finally, spraying with a high-gloss spray enamel paint. Avoid placing a direct heat source on or near surfaces unless using a heat barrier.

LIFETIME OUTDOOR SHED EQUIPMENT

10-YEAR LIMITED FACTORY WARRANTY

THE MANUFACTURER RESERVES THE RIGHT TO MAKE SUBSTITUTIONS TO WARRANTY CLAIMS IF PARTS ARE UNOBTAINABLE OR OBSOLETE.

1. Lifetime outdoor sheds are warranted to the original purchaser to be free from defects in material or workmanship for a period of ten years from the date of original retail purchase. The word "defects" is defined as imperfections that impair the use of the product. Defects resulting from misuse, abuse or negligence will void this warranty. This warranty does not cover defects due to improper installation, alteration or accident. This warranty does not cover damage caused by vandalism, rusting, "Acts of nature" or any other event beyond the control of the manufacturer.

2. This warranty is nontransferable and is expressly limited to the repair or replacement of defective product. If the product is defective within the terms of this warranty, Lifetime Products, Inc. will repair or replace defective parts at no cost to the purchaser. Shipping charges to and from the factory or distribution center are not covered and are the responsibility of the purchaser. Labor charges and related expenses for removal, installation or replacement of the shed or its components are not covered under this warranty.

3. This warranty does not cover scratching or scuffing of the product that may result from normal usage. In addition, defects resulting from intentional damage, negligence, unreasonable use or hanging from the truss will void this warranty.

4. Liability for incidental or consequential damages is excluded to the extent permitted by law. While every attempt is made to embody the highest degree of safety in all equipment, freedom from injury cannot be guaranteed. The user assumes all risk of injury resulting from the use of this product. All merchandise is sold on this condition, and no representative of the company may waive or change this policy.

5. This product is not intended for institutional or commercial use. Lifetime Products, Inc. does not assume any liability for such use. Institutional or commercial use will void this warranty.

6. This warranty is expressly in lieu of all other warranties, expressed or implied, including warranties of merchantability or fitness for use to the extent permitted by Federal and state law. Neither Lifetime Products, Inc., nor any representative assumes any other liability in connection with this product. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

PLEASE INCLUDE YOUR DATED SALES RECEIPT AND PHOTOGRAPHS OF DAMAGED PARTS.
